

6501

Metal Waterproof Access Control

1. Introduction

This is a proximity and waterproof access controller, IP65, which is a modern and advanced access control system. It uses the latest central processor(CPU). 6501 can store 2000. It supports card, card plus PIN and card/PIN three access modes, also can add PIN independently. Anti-vandal, alarm, exit button, safe mode, wiegand input/output, etc, which make the user safer.

2. Technical Specifications

Features	Description
Appearance	Metal case, anti-explosion and anti-lamper
Waterproof	IP65
Input voltage	DC: 12-24V AC: 12-18V
Capacity(max)	2000
PIN	4-8 digits, Not related to the card.
Master card	Add/delete user
As reader	Support Wiegand 26bits, PIN wiegand output is virtual number.
Connect external reader	Can connect any EM/HID/IC readers with wiegand 26 output
Connect high power alarm	External current of the alarm $\geq 3A$

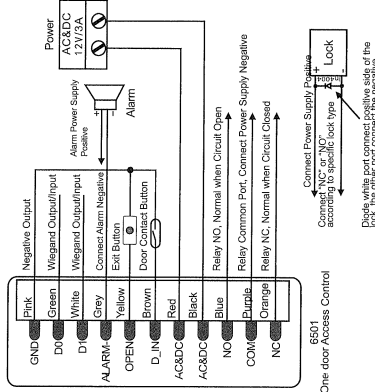

3. Installation Procedure

- 3.1 Installation and Fixation
 - 3.1.1 Drill hole on the wall according to the back size of the machine or install distributing box well.
 - 3.1.2 Thread the cable through cable hole, connect related cable. For the un-used cable please separate with insulating tape and keep well in case of short circuit.
 - 3.1.3 Fix back cover on the wall or distributing box with screw.
 - 3.1.4 After wiring, install front casing to the back casing and fix well.

3.3.1 Common power supply

PCB connect diagram

3.2 Wiring

Function	Color	Description
D0	Green	Wiegand 26 output/input
D1	White	Wiegand 26 output/input
ALARM-	Grey	Alarm Negative
OPEN	Yellow	Request to Exit Button
D.JIN	Brown	Door Contact
AC&DC	Red	12V AC&DC Regulated Power Input
AC&DC	Black	12V AC&DC Regulated Power Input
NO	Blue	Relay NO
COM	Purple	Relay COM
NC	Orange	Relay NC
GND	Pink	Negative

4. Administrator Operation

1. To Reset to Factory Default
To reset to factory default, power off, press "*", hold it and power on, release it until hear two beeps and the LED turns in orange, it means waiting for adding master card. Then read any two EM cards, the first one is "adding user card", the second is "deleting user card". After that, the LED will turn in red, means succeed in resetting to factory default and adding the master card. If don't set master card in 10 seconds, LED will turn in red, and machine enters into working status. **Note: Reset to factory default, the user's information is still retained.**
2. Enter into Programming Code:
Press [1] [Master code] [#] 888888 is the default factory master code.
Note: Below 3 to '11 items all operation need in programming mode.
3. Change Master Code:
Press [0] [New code] [#] [New code] [#]
Note: the master code can be any 6 digits, please stores well.
4. To add users
 - 4.1 To add card users automatically
Press [1] [Read card] [Read card] [#]
Mark: The range of ID number: Any number between 1-2000. The ID number is auto generation and be Search continuously. The add card will auto associate PIN "1234" (factory default), this PIN could not open the door.
 - 4.2 To add card users manually
Press [1] [ID number] [#] [read card] [ID number] [2#] [read card] [#] [#]
Mark: Press [#] means "confirm", Press last [#] means end of the current settings. Press [*] means to exit the current operation
 - 4.3 To add no-card users
Press [1] [ID number] [#] [PIN 1] [ID number] [2#] [PIN 2] [#] [#]
Mark: The PIN of 6501 is 4-8 digits any number(exception of 1234)

•03•

•04•

4.4 To add card users synthetically
 Press [2] [Read card1] [ID number 1#] [read card2] [ID number 2#] [PIN#] [#]

4.5 To add users by manager card
 Manager add card [Swipe add user card continuously]
 Manager add card
 That is exit add users settings

4.6 To add consecutive card users
 Press [5] [ID number #] [8 digits number 1#] [Card number #] [Mark: The quantity of 6501 could not exceed 2000. The ID number must be continuous vacant number.

5. To delete users

5.1 Auto Delete
 Press [2] [Read card1] [Read card2] ... [#]

5.2 Manual Delete
 Press [2] [ID number 1#] ... [#]

5.3 Synthetical Delete
 Press [2] [Read card1] [ID number 1#] ... [#]

5.4 Delete all users
 Press [2] [0000] [#]

5.5 To delete User by Manager Delete Card
 Manager delete card [Swipe delete user card continuously]
 Manager delete card
 That is exit delete users settings

6. Door Open mode settings

6.1 Open by cards:
 Press [3] [0] [#]

6.2 Open by cards+PIN
 Press [3] [1] [#]

6.3 Open by cards or PIN(factory default)
 Press [3] [2] [#]

7. Door relay time settings

Press [4] [0-99] [#]
 Marks: The door relay time is between 0-99 seconds, the factory default setting is 5 seconds.

8. Door open detection settings

8.1 To disable door open detection. (Factory default)
 Press [6] [0] [#]

8.2 To enable door open detection
 Press [6] [1] [#]

8.2.1 When used with the function, there are two situations: if the door is opened normally, but not closed after 1 minute, the inside buzzer will beep automatically to remind people to close the door and continue for 1 minute before switching off automatically.

8.2.2 If the door is forced open, the inside buzzer and alarm output will both operate.

9. Security Mode settings

9.1 Normal status:(Factory default)
 Press [7] [0] [#]

9.2 Keypad Lockout
 Press [7] [1] [#]

9.3 Alarm Output
 Press [7] [2] [#]
 If there are 10 invalid cards or 10 incorrect PIN numbers in a 10 minute period either the the outside buzzer and alarm output will both operate.

10. To set the keypad sound ON or OFF

10.1 OFF-The device will be in silence except entering the programming mode
 Press [8] [0] [#]

10.2 ON-The device will give the voice when press the keys (factory default)
 Press [8] [1] [#]

11 Alarm output time

Press [9] [1-3] [#]
 Factory default is 1 minute

5. User Settings

1. Cards users change the PIN

[Read Card] [Old PIN] [#] [New PIN] [#] [Repeat New PIN] [#]
 Marks: The PIN of 6501 PIN can be 4-50digits. The PIN could not change to "1234"

2. No card users the PIN

[ID number #] [Old PIN] [#] [New PIN] [#] [Repeat New PIN] [#]
 Marks: The PIN of 6501 PIN can be 4-50digits. The PIN could not change to "1234"

3. Open door by users card

[Read Card] if it is valid ,the door will open.

4. Open door by PIN

Users PIN # if the PIN is right, the door will open.

5. Open door by users card+PIN

[Read Card] [Users PIN] [#]
 If the card and PIN are right, the door will open.

6. To remove the alarm

6.1 The inside buzzer and alarm output will both operate.
 Read valid card / or press Master Code [#] to reset the Door Forced Open warning.

6.2 Close the door forced warning
 Close the door or [Read valid card] or [Master Code] [#] to reset the Door Forced warning

6. Sound and Light Indication

Operation Status	Red Light	Green Light	Buzzer
Stand by	Slow flash	Off	-
Press keypad	-	-	Short Ring
Operation successful	Off	Bright	Ring...
Operation failed	-	-	3 Short Rings
Enter into programming mode	Bright	Off	Ring...
In the programming mode	Bright	Bright	-

7. Specifications

Operating Voltage	DC:12-24V AC:12-18V
Idle Current	35±5mA
Active Current	<80mA
Card Reading Distance	3-6 cm
Operating Temperature	-40-60°C
Lock Output Load	2A
Alarm Output Load	3A

8. Packing List

Name	Size	Quantity
Machine	6501	1 set
Packing box	6501	1 piece
Rubber bungs	Ø4mm X28mm	4 PCS
Self-tapping screws	Ø4mm X28mm	4 PCS
Master Card		2 PCS
Screw driver	Star diagram	1 piece
Drying agent		1 Package

Remarks: Master Card (Master Add Card & Master Delete Card).
